Objective

Motivated Backend Developer with experience in microservices architecture, IAM implementation, and scalable system design. Seeking to contribute technical expertise to a growth-oriented organization.

Skillsets

- **Programming languages:** C, JavaScript
- **Frontend:** React.js, HTML, CSS, JavaScript, Bootstrap, Tailwind, Redux Toolkit, WordPress and Shopify
- **Backend:** : Node.js, Express.js, ORM -Sequelize, REST APIs, Microservices Architecture
- **Database:** MySQL, MongoDB,Redis
- **Tools:** Postman, Thunder Client, NPM, Render, Vercel, GitHub
- **Message Broker**: Apache Kafka

Personal Projects

- **Doctor Appointment:**

  Developed a full-stack doctor appointment website using the MERN (MongoDB, Express.js, React.js, Node.js) stack, enabling users to create accounts, log in, and schedule appointments based on their availability. Integrated Razorpay for secure online payment processing. Also implemented admin and doctor panels to effectively manage and track appointments.

- **Portfolio**

  This website was developed using React and Tailwind CSS. It incorporates a contact form that allows users to submit their advice or suggestions. Form spree is utilized to securely receive the information entered through the contact form.

- **E-commerce:**

  This e-commerce website uses React for the frontend, Node.js/Express.js for the backend, and MongoDB for data storage. It features a fully responsive design with Bootstrap, allowing users to register, track purchase history, and manage their shopping cart. After logging in, users can easily browse products, add items to their cart, and review selections before completing their order.

Educational Qualification

Qualification	Institute/School	Stream	Passing Year	Results
Graduation	Trinity Institute of Professional Studies	Bachelor of Computer Applications	2025	7.6 CGPA
Diploma	Gro Tech Learn Foundation	Diploma in Computer Applications	2022	A+
Intermediate	Navyug Convent Sr. Sec. School	Arts with Maths	2021	69%
Matriculation	Navyug Convent Sr. Sec. School	English, Maths, Science, Social Science, Hindi	2019	75%

EXPERIENCE

- **Acetech Information Systems Pvt. Ltd** (Backend Developer) *September 2025- Present , New Delhi*

  • Worked on a microservices-based ESL project, developing and maintaining scalable backend services.
  • Designed and implemented a complete IAM (Identity and Access Management) system with secure authentication and RBAC authorization.
  • Integrated Apache Kafka for event-driven communication and built background workers & schedulers for asynchronous processing.
  • Implemented Redis-based login session management and optimized system performance using caching strategies.

- **NexGen Innovators IT Services Pvt Ltd** (Front End Developer) *June 2025-August 2025, New Delhi*

  • Worked on multiple WordPress and Shopify projects, responsible for creating new sections and customizing functionalities.
  • Utilized various WordPress plugins to enhance website features and improve performance.
  • Added custom sections and blocks in Shopify to enhance user experience and content flexibility.
  • Performed MS, VT, and SPU testing on WordPress projects to ensure quality and functionality.
  • Managed website hosting tasks with Hostinger services.

- **CodyNest Technologies** (Front End Developer Intern) *January2025-March2025*

  My front-end internship at Codynest provided me with valuable hands-on experience in developing user interfaces with React and styling them effectively with Tailwind CSS. I successfully built the landing panel for their website and implemented a comprehensive set of user authentication features, including login, signup, and reset password flows. I also developed key user management functionalities such as account settings, account deletion, account restoration, and user activation/deactivation. I also gained experience in securing the application by implementing route protection.

- **Go Business India** (Front End Developer Intern) *June2024-July2024,Uttam Nagar*

  During my internship at Go Business India, I actively contributed to three distinct projects. One project was developed for their client , while the remaining two were focused on developing clones of popular e-commerce platforms: Myntra and MakeMyTrip.
